Sustainability Commitment

Dedicated to designing long-living timeless bathware, Astra Walker products minimise impact on the environment by being useful for as long as possible.

As both designer and manufacturer we have the advantage of holding complete control over all elements of every single piece of bathware. Crafted to the highest standard and certification in Australia, we ensure that only the most durable materials are used, that parts remain accessible for years to come, and that eco-sustainable solutions underpin ongoing business practices.

We are on a journey and are working towards a more responsible future, including the following sustainability initiatives:

Timeless Bathware

Astra Walker design long-living and timeless bathware.

Astra Walker products are built to last, products that are avowedly long-term in their outlook. Products that do not strive for the obsolescence of trends but prefer to be discreet, adaptable, faithful, and perennial companions. Products that minimise their impact on the environment and resources by being useful for as long as possible. It is consuming less and living better with items that last longer.

Longevity & Preservation

Astra Walker provides ongoing repair service and part replacements for decades.

As both the designer and manufacturer Astra Walker have full control over every element of our products. This allows us to guarantee superior quality and ensure that you can easily find spare and replacement parts for years to come. With Astra Walker, you can trust that your bathware will not only look great, but also last a lifetime.

Materials & Manufacturing

Astra Walker's products are made using only the highest quality superior materials.

Designed with high-quality specification, over cheaper alternatives like hollow cast metals that will degrade quickly, our products have a seamless finish to ensure flexibility, adaptability, durability and therefore, longevity. Advanced technologies such as PVD finishing is undertaken in our Sydney workshop and sets the benchmark for durability with clean and safe process also ensuring no polluting liquids or toxic waste are produced.

Reuse & Reduce

Astra Walker reuse and create efficiencies wherever possible.

Eco-sustainable processes have been established to reduce impact such as recycling brass and swarf from the manufacturing process and creating new brass components with the recycled materials.

Australian Made

Astra Walker tapware is designed and manufactured in Australia.

Crafted to the highest standard and certification in Australia, this minimises carbon emissions and allows for products including spares and replacement parts to remain accessible and within easy supply.

Water Conservation

Astra Walker products contribute to water conservation.

Water conservation is built into the very fabric of every Astra Walker product with the most demanding certification requirements and state-of-the-art testing undertaken to ensure the water integrity of each item. Astra Walker is recognised by the Australian Government, and WELS certified up to 6 Star efficiency ratings.

Energy Conservation

Astra Walker has implemented a strategy to reduce energy consumption.

Astra Walker has taken steps to minimise energy consumption within its factories including switching to LED lights. The Sydney manufacturing facility is also in the process of upgrading to solar energy.
