

Shower & Bath Tapware

Applies to: Shower Mixer Sets, Bath Mixers, Diverter, Bath Outlets

Scope of Use

This document specifies the intended application and technical boundaries for Astra Walker sanitary tapware. This product is intended for personal hygiene and bathing applications and is not intended for the delivery of water for human consumption. This product is exempt from the lead-free requirements of the National Construction Code (NCC) Volume Three – Plumbing Code of Australia.

Installation Requirements

Product must be installed by a licensed plumber in accordance with AS/NZS 3500, the National Construction Code Volume Three, and all relevant regulatory provisions.

- Suitable for indoor water supply use only.
- Working Water Pressure: 150–500 kPa.
- Maximum Water Temperature: 65°C.
- Pipework must be thoroughly flushed out prior to installation.
- Ensure any flow controller incorporated in the outlet is tightened to prevent removal by hand.

In-wall penetrations must be sealed and integrated with the building's wet area waterproofing system in accordance with AS 3740.

Important: All in-wall valve bodies and joints must be hydrostatically tested for integrity before concealing, tiling, or enclosing.
